AI-NATIVE ACADEMIES FOR SERIOUS MEDICINE

One academy.
Every learner you serve.

Perceptor turns your organization's clinical knowledge into a complete branded academy — courses, assessments, a personal AI tutor, a living library — so your teams master new therapies and your customers master your products, in any language. **Your experts approve every claim.**

WHO IT'S BUILT FOR

ORGANIZATIONS

Train & upskill your clinical workforce

New therapies, protocols, and devices — **consistent, evidence-locked education** for physicians, nurses, and staff, delivered in every language they work in.

COMPANIES

Educate the market that buys your products

Give clinicians and wellness professionals a place to truly master your tools — **a flywheel of competence, satisfaction, and referral** they keep returning to.

THE PERCEPTOR STANDARD

MEDICALLY OPTIMIZED

Evidence first. Always.

Every lesson grows from a **locked evidence base** — each claim cited to its source, visible to learners, auditable by you. Clinical and regulatory review gates stand before anything ships. **AI drafts; your experts approve.**

DEEPLY PERSONALIZED

Every learner, met where they are.

An AI tutor grounded **only in your approved material** adapts depth, style, and pace to each learner. Mastery is proven in a **live, personal conversation**, never a quiz a chatbot can pass.

LOCALLY ADAPTED

Native to every market.

This is **localization, not translation**: local terminology, units and reference ranges, country-specific regulatory context built in — with natural narration voices in any language.

INSIDE EVERY ACADEMY

- ✓ **An adaptive library** — evidence & field intelligence, ranked to each learner
- ✓ **Mastery conversations** — un-gameable oral-style exams
- ✓ **Faculty-graded capstones** for certification that means something
- ✓ **Flexible formats** — 5-minute phone-first lessons to full certification, or blended
- ✓ **Your brand & credential** on every certificate
- ✓ **Living courses** — new evidence flows in, reviewed before it ships

YOUR ACADEMY, IN THREE HONEST STEPS

1

Bring us your knowledge

Research, protocols, product science, faculty voice — whatever your teaching is built on.

2

We build; your experts approve

Our engine drafts curriculum, media, assessments, and languages. Your reviewers gate every claim.

3

Launch — and keep growing

Live under your brand in weeks, improving as learner questions and new evidence flow back in.

Teach the people you serve *what they need to know.*

Start the conversation — **perceptors.ai**
